

HOW PICUS HELPS TO OPERATIONALIZE MITRE ATT&CK

The Picus Complete Security Control Validation Platform tests the effectiveness of your security controls against the latest attack techniques and maps results to the MITRE ATT&CK framework - enabling you to **measure threat coverage and visibility.**

THE PICUS COMPLETE SECURITY CONTROL VALIDATION PLATFORM

1. CHOOSE ATTACKS FROM A RICH THREAT LIBRARY

Over 11K real-world threats, updated daily to reflect the latest tactics, techniques and procedures (TTPs)

- 7000+ Malware Attacks
- 2000+ Web Application Attacks
- 1000+ Endpoint Attacks
- 900+ Atomic Attacks
- 750+ Vulnerability Exploitation Attacks
- 250+ Data Exfiltration Attacks
- 100+ Adversary Group/Malware Scenarios

2. SIMULATE ATTACKS

Challenge the effectiveness of your existing security controls, **continuously and on-demand**

Test security controls including:

- NGFW, WAF and IPS
- SIEM
- EDR and EPP

3. VALIDATE YOUR CONTROLS

Measure the effectiveness of your security tools to **prevent, detect and respond to attacks**

- Validate log source and telemetry ingestion
- Validate detection and alerting rules
- See results mapped to MITRE ATT&CK

4. MITIGATE GAPS

Identify and address the highest priority gaps in your current ATT&CK coverage and receive actionable insights and content to mitigate them

Mitigation support includes:

- A library of 70K+ easy-to-apply prevention signatures and detection rules
- Insights to aid prioritization of new telemetry and log sources

ENHANCE SECURITY OUTCOMES WITH PICUS

- ✓ Improved cyber resilience
- ✓ Reduced security fatigue
- ✓ Broader threat coverage and visibility
- ✓ Swifter mean time to detect and respond
